PostgreSQL, Firebase

## Projects

**D&D Character Sheet Builder**
Web Application - Node.js, Express.js, PostgreSQL, Heroku, HTML, CSS
- Worked within a team of four using Agile development practices to create a full-stack web application for creating and viewing Dungeons & Dragons Character Sheets
- Designed and Implemented RESTful API

**React Social Media**
Web Application - React, Firebase, HTML, CSS
- Created a full-stack social media app for students in a team of three using React and Cloud Firestore database

**VR Mania!**
iOS App - C#, Unity, Maya, XCode
- Developed a virtual reality 3D arcade-style shooting game for Google Cardboard/iOS where players fire projectiles at an array of moving targets

**Weather App**
Web Application - JavaScript, Bootstrap, HTML, CSS
- Used WeatherStack's API to display current weather stats and a five-day forecast for any latitude/longitude coordinates

## Experience

**The Walt Disney Company, Walt Disney World Resort**                    July 2018 - January 2019
Disney College Program Intern - Attractions Host | Orlando, FL
- Promoted efficiency in a multi-dimensional team by loading/unloading guests on the attraction, assisting guests with special needs, and managing fast passes
- Demonstrated ability to problem-solve and perform under pressure on a daily basis while operating a highly technical ride system that served over 22,000 guests per day

**The Walt Disney Company, Walt Disney World Resort**                    January 2018 - July 2018
Disney College Program Intern - Quick Service Host | Orlando, FL
- Provided exceptional guest service to customers while working in a fast-paced restaurant environment
